# JACK IS BETTER IN BLACK

## BLACKJACK SICKLE SCALER

The Blackjack dental hygiene instrument is a universal supragingival sickle scaler that can enhance tooth debridement in a quick, efficient, and ergonomic manner.

The length of the shank is 4mm longer than comparable instruments.\* This makes it ideal for calculus removal of the entire dentition, allows for better reach, and the fine tip aids in the removal of hard-to-access stains.

SKU #: AESBJX

● **Less sharpening is required** with strong, heat-treated steel.

● **The unique knurl pattern** provides a secure grip without applying pinch force.

● **The lightest handles on the market!** Eaglelite® medical-grade resin handles are half the weight of traditional stainless steel handles.\*

● **The 6-line design** shows where fingers should naturally rest and provides a warning if positioning starts to slip.

● **Longer shank for better access** than comparable instrument designs.\*
