

PURIT™

Cide-it™ III

Effective. Versatile. Trusted.

Purit™ Cide-it™ III

is an advanced ultrasonic cleaning and presoak solution designed to efficiently clean and disinfect instruments. Formulated with comprehensive EPA-approved germicidal, fungicidal, virucidal, and tuberculocidal capabilities, it ensures enhanced safety by reducing the risk of exposure to residual biohazards during instrument reprocessing, offering reliable protection and greater peace of mind through proven efficacy claims prior to sterilization.

Features & Benefits

Broad-Spectrum Disinfectant with Enhanced Safety Assurance:

Proven germicidal, fungicidal, tuberculocidal, and virucidal efficacy provides comprehensive protection, offering an additional layer of assurance compared to standard enzymatic or detergent-based solutions prior to sterilization.

Dual-Purpose Formula:

Functions as both a powerful presoak and ultrasonic cleaning solution, simplifying reprocessing workflows.

Pleasant Fragrance with Odor Neutralization:

Controls odors by eliminating odor-causing bacteria and chemically neutralizing residual smells.

EPA-Recognized for Emerging Viral Pathogens:

Validated effectiveness against new and evolving viruses, providing critical preparedness and confidence in infection control protocols during outbreaks.

Concentrated & Economical:

Just 1 oz per gallon dilution provides high performance with lower cost per use.

Compatible with a Wide Range of Surfaces:

Safe for use on stainless steel, glass, ceramics, plastics, and instrument materials commonly found in dental and medical practices.

Item #: PI016A
