

FOR AN ENHANCED LEVEL of Comfort, Protection & Value

Experience the comprehensive TruFit™ glove collection from Young Innovations – your complete solution for practice-wide hand protection. Our TruFit™ brand delivers medical-grade performance across multiple material options, including ultra-thin nitrile, premium chloroprene, and specialized formulations, all designed with the same commitment to safety, comfort, and tactile sensitivity that dental professionals demand. From vibrant colors that brighten patient interactions to advanced barrier protection that meets the highest industry standards, TruFit™ offers the versatility and reliability to keep your entire team protected while maintaining the precise dexterity essential for quality dental care.

TruFit™ Violet Ultra Thin Nitrile Gloves

The TruFit Violet Ultra-Thin Nitrile Gloves are disposable gloves made from nitrile, a latex-free material. These gloves are designed to be both thin and durable, offering a good sense of touch and texture on the fingers for better grip. They are suitable for various applications including dental and medical examinations, food services, and cleaning tasks. The gloves come in different sizes and are powder-free, making them safe for people with latex allergies and sensitive skin.

TruFit™ Sky Blue Nitrile Gloves

Nitrile gloves are a type of disposable glove made from synthetic rubber. Unlike latex gloves, which are made from natural rubber, nitrile gloves are latex-free, making them ideal for people with latex allergies. They are known for their superior resistance to chemicals and punctures compared to other types of disposable gloves. Nitrile gloves are commonly used in various settings, including medical, dental, laboratory, and food handling, due to their durability and high level of protection. Also available in 100ct boxes.

TruFit™ Pink and Green Chloroprene Gloves

TruFit™ Chloroprene Gloves are ideal for working in wet and moist conditions. As a great alternative to rubber latex material, these chloroprene gloves are comfortable, reliable, maintain excellent grip in both wet and dry environments and suitable for those who suffer from rubber latex allergic reactions. In addition to being easy to put on while hands are still damp, TruFit Chloroprene Gloves are powder-free, ambidextrous and finger-textured and offer excellent tactile sensitivity.
